

SLEEPING MAT (IFRC SPEC.)

SLEEPING MAT

Length	: 1.8m
Width	: 0.9m
Weight	: 500 gm per Sqm
Finish	: Trim finished
Colours	: Assorted colours
Material	: Warp: Pure virgin polypropylene (PP) multifilament 500 deniers minimum Weft: Recycled polypropylene (PP) hollow tubes not containing any filler
Specification	: Tightly woven using a monofilament warp and flat tape welt. All edges are secured, the length-wise edges are mechanically secured. The width-wise edges are secured by binding tape with stitches through the fabric of the mat. The binding is secured and durable to prevent the fraying of the mat, which would result in rapid disintegration of the structure. 1000 Tubes in weft per meter length
Packing	: 25 pcs in a bale
Volume	: 5500 Pcs in 20 feet container
